Over the last several generations, Anderson Hay & Grain Co., Inc. has become the leading exporter of hay and straw products, specializing in Timothy Hay, Alfalfa Hay and Grass Straw products. We remain committed to our core values of building strong relationships, honing our operational expertise and earning respect through unwavering principles. Established more than a half a century ago by our family founders, our values have sustained our pioneering expertise and are the foundation of our success.

Our corporate headquarters is located in Ellensburg, WA. Every aspect of our corporate services is handled through this facility. From sales to technology, we provide friendly service to everyone we do business with. Our state of the art production facilities are capable of producing a variety of product and packaging

options to meet all of our customers' needs. Anderson's production network consists of many family owned farms throughout the Western United States. The success of Anderson in large part is due to this strong grower base that has been developed over generations. We maintain very strong relationships with our growers, working together with them on planting, harvest and production decisions. These growers allow Anderson the ability to provide consistent quality product year round to meet specific market needs.

Oregon Division: Grass Straw

Anderson Hay & Grain Co., Inc.'s Oregon Division specializes in double compressed Oregon Grass Straw, providing a group of consistently palatable and cost effective forage fibers to export markets. The entire line of Grass Straw products are offered in a number of packaging options, including big bale. These products diversify what Anderson has to offer our valued customers and are a popular and reliable source of roughage for dairy and beef farmers. Anderson Aurora utilizes the largest network of storage facilities in the industry to ensure a constant year-round supply of dry, top-quality fiber. Anderson is dedicated to the long term growth and relationships with landholders. Along with our commitment as a reliable buyer of baled product, we custom harvest and offer a very competitive stubble fee program.

Youth Ag Day Welding Contest

High school students from around Oregon will compete in a welding competition at Linn-Benton Community College as part of the Willamette Valley Ag Expo's Youth Ag Day on Wednesday, November 15. All students participating in the contest will return to the expo for a presentation on agricultural careers and enjoy a celebratory pizza lunch, courtesy of the Ag Expo.

The Expo is also sponsoring the prizes for the competition. The winner will receive a new welder for their school. Other prizes include welding hoods, gloves, and safety equipment.

The welding competition has three separate categories: Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), and Combination Welding.

Shielded Metal Arc Welding is a series of welds utilizing industry standard maintenance rod including 7018 and 6011. Machines vary in brands and are set to zero prior to the start of all competitors' usage. The competition incorporates precut material and several welds including but not limited to Butt Welds, Fillet Welds, and Lap Welds. Contestants have 40 minutes to assemble and weld out their product. Judging is based on correct assembly of parts and overall weld appearance.

Gas Metal Arc Welding is a series of welds utilizing .035 70s-6 welding wire with 75% Ar/25%CO₂ cover gas. Students compete with a Millermatic 252 that is set to zero prior to the start of all competitors' usage. The competition incorporates precut material and several welds including but not limited to Butt Welds, Fillet Welds, and Lap Welds. Contestants have 40 minutes to assemble and weld out their product. Judging is based on correct assembly of parts and overall weld appearance.

Combination welding incorporates Gas Tungsten Arc Welding, Shielded Metal Arc Welding, and Gas Metal Arc Welding on steel. These competitors will assemble precut parts and weld out specific joints in relation to the blueprint given. It includes several welds in multiple joint designs and possible repetitive welds. This competition is encouraged for Juniors and Seniors with a fair amount of skill and mechanical aptitude. Contestants have 60 minutes to complete assembly and weld out of their project. Entry in this category is limited to one welder per school.

Last year, students competed from Eagle Point High School, Santiam Christian, Monument School, Lebanon High School, Silverton High School, Crow High School, and Glide High School.

2023 Willamette Valley Ag Expo

Linn County Fair & Expo Center
November 14 - 16, 2023

LINN BENTON TRACTOR

Linn Benton Tractor has been serving Willamette Valley customers for the past 33 years under the ownership of Don and Vivian Kropf.

On July 1st, 2023, Don and Vivian sold the business to Oregon Equipment Sales.

Oregon Equipment Sales (OES) currently has two other dealerships, one in McMinnville, Oregon and one in Hubbard, Oregon.

Acquiring Linn Benton Tractor is a strategic step to advance OES' pursuit of establishing a more expansive and specialized dealership platform.

A trailblazer in the Northwest agricultural equipment sales and service sector, OES offers a diverse range of equipment, with brands such as Kubota, Land Pride, Stihl, Exmark, Weiss McNair, Gearmore and Collard. With this acquisition, OES can further cater to its customers by introducing additional equipment options, including Krone, Great Plains and Flory brands.

Oregon Equipment Sales has an unwavering commitment to become the "Local Dealer of Choice" for all consumer, agricultural and construction equipment needs within Oregon.

OES is excited to fulfill their mission to empower our employees with pathways for advancement and contribute to our future growth.

The Linn Benton Tractor establishment in Tangent will continue to operate under its established name. The tradition of proactive involvement with and support for the local community and surrounding regions remains the cornerstone that shall continue and flourish.

Compressed Air Solutions to Fit the Ag Industry

We got our start serving the Agriculture Industry in 1998 and haven't forgotten where we came from. We're dedicated to creating the right solution for your needs.

Northwest Compressor services and maintains nearly every model of reciprocating or rotary-screw type air compressor, including all major brands of diesel and gas-powered portable compressors. We stock industrial-duty compressors and many parts, equipment and accessories for compressors, air dryers and piping.

We offer in-shop and on-site service for your system throughout the Willamette Valley and even provide 24-Hour Emergency Service.

We are a Full Service Company with the ability to design, install, maintain and service your compressor, air dryer and air delivery (piping) system. Call us to see how we can help.

Orchard Machinery Corporation

Orchard Machinery Corporation was formed in 1961 in California out of the idea and necessity to mechanize prune harvest. Since then, the OMC team have leveraged technology and an innovative spirit to help farmers with their harvest efficiency across a wide variety of nuts and fruits, on all continents except Antarctica. At their main Yuba City, CA facility, OMC combines modern manufacturing processes with decades of nut tree know-how to ensure you receive the highest quality product that will provide you years of dependable service. OMC sources high quality components from established brands and develops new technologies and processes wherever possible to improve the product, such as robotic welding and powder coat finishing.

While OMC's expertise began and developed through self-propelled tree shakers for nut tree harvesting, the product portfolio has grown over the years to include a full suite of material handling equipment such as conveyor carts, shuttles, and elevators, as well as transportation solutions such as hopper, supper hopper, ag flat, and hay flat trailers under the Wesco brand.

OMC's most recent breakthroughs have come in the orchard maintenance field. Starting with the Hedgehog Model 3000 family of hedgers, OMC offers growers a versatile, safe, and intuitive hedger with modern controls and creature comforts. The Brush Hog center delivery hydraulic rake mounts to a standard 3-pt hitch and enables swift raking of trimmings, eliminating hundreds of man-hours of manual hand-stacking. Finishing the process, the all-new E-Limb-inator shredder turns the raked trimmings into nutritious mulch for the land to reabsorb.

Come see for yourself why OMC is considered a leader in the nut harvesting industry.

SUCCESSION PLANNING BASICS

Starting the conversation, familial and non-familial transfer and logistically making it happen.

Successfully passing on a farm can happen! Join us to discuss how either generation can start the conversation, considerations for family or non-familial succession, and making sure the right people at the table to work through obstacles. We'll take it a step further and walk through the things to think about before, during and after transition including knowledge transfer of key operational information, mentorship opportunities, a timeline for transition and professional resources to call on as you work through the process.

SMITH SEED SERVICES

Smith Seed Services has been serving grass seed growers in the Willamette Valley for over 50 years. As seed marketers we understand the challenges of doing business in domestic markets as well as export markets. We understand and appreciate the challenges growers face in producing quality seed in the Willamette Valley.

The company was founded by George Smith, a local farmer and grass seedsman, who converted a milking barn into a seed cleaning plant. Some years later Mr. Smith sold his company to two of his young employees Jason Schrock and Paul Zehr who turned the company into an independent partnership and with their progressive vision and leadership we continue to experience growth and diversification.

Since the early days of seed cleaning, our company has experienced a couple of name changes from the original **Smith Warehouse** when doing business locally cleaning and buying seed from local growers and reselling to seed companies in the valley, to its present name **Smith Seed Services** to reflect its way of doing business on a national level and beyond. We have grown and expanded to offer many other areas of services, including:

Custom Seed Cleaning - we have the capacity to clean, store and market open varieties grown by Willamette Valley farmers.

Seed Production - we own a line up of proprietary turf-type and forage-type grass seed varieties, and we contract with growers to produce for us. In addition, we also place acres for both domestic and international seed companies.

Seed Marketing - we market seed in domestic markets as well as export markets around the world.

Local trucking - we handle shipping of seed containers from the valley to the shipping ports for many seed companies throughout Oregon.

Custom seed packaging - We specialize in custom seed packaging for multiple customers in the retail markets including national brands and chains.

Seed Coating - We have been coating seed since 2008. We custom coat many types of seeds - alfalfas, clovers, and grass seeds. We now offer our trade mark Nitro-Coat scientifically formulated for clover and alfalfa seeds.

Smith Packaging - is a marketing division of Smith Seed Services. Its primary focus is selling packaging products. We offer domestic and imported bags and carry many sizes on inventory for immediate delivery.

Not located in the Willamette valley? No problem we have great pallet rates enabling us to competitively ship product throughout the Northwest, Idaho and California.

The scope of our service is not limited to only serving our local seed industry, but also the feed, grain, fertilizer and many other industries that are in need of attractive packaging to market their products in both wholesale and retail capacities.

We are able to meet demands for paper bags, poly woven bags, bulk bags, and BOPP bags. We stock warehouse products, including: stretch films, pallet covers, sewing threads, heat treated pallets, stencil inks, stencil brushes, rollers, staples, etc.

We are a dealer for Fischbein portable sewing machines, and offer service and parts.

We offer custom design services to help you develop a printed bag to advertise and market your product better. We have partnered with suppliers who can design and build bags to meet your exact specifications to fit your own packaging and market applications.

As needs for packaging change we stay tuned to our customers needs and are committed to provide value, quality and service on every product we sell.

Come visit us in our office located at
31460 Crook Drive - Halsey, Oregon 97348.

Or take a virtual tour at <http://www.smithseed.com>.

Come get to know us, and tell us how we can serve you. We will be in the Willamette building in booth 158.

GK MACHINE INC.— Helping You Increase Efficiency!

GK Machine, Inc.

Combining Technology & Tradition Since 1976

3W6 Swamp Buggy

The 3W6 Buggy is more maneuverable than other buggies on the market and is a great choice for light-weight and high flotation applications for both spraying and spreading.

Greenhouse 5000 Series

Simple and effective design now all steel construction!

Purchase greenhouse parts! Fans and heaters available!

Greenhouse 9000 Series

Gutter-connect system means no land waste between greenhouses!

Parts Counter

Visit our parts counter for help with Ag parts. Many supplies are in-stock!

Repair

GK Machine repairs all brands of Ag equipment!

About GK

GK MACHINE IS MORE THAN A ONE-STOP-SHOP!

We do it all here at one location. Since 1976 GK Machine's goal has been to create exceptional value for our customers by focusing on the design and manufacturing of quality equipment. The combination of progressive engineering, lean manufacturing with advanced software, and highly automated CNC machining helps GK Machine meet and exceed our customer's expectations.

AG EQUIPMENT GK's agriculture machines are a great fit for a variety of applications. Our engineers go to great lengths to ensure we use the most efficient and cost-effective design to help your bottom line, just some of the equipment we manufacture includes:

3W6 Sprayer	H9 Tree Digger
Fuel Storage Tanks	Nursery Trailers
Nut Sweeper	Nut Cart
Nut Harvester	Pull-style Spreader
Switchblade Scraper	Portable Toilet Trailers
TR6 Sprayer	Pot-in-Pot Planter
Orchard Leveler	ATV Bait Spreader
Dripline Hose Reels	Wash Stations
Pipe Trailers	Spread-Pro
Shade Trailers	ATV Dump Trailer

CONTRACT MANUFACTURING GK provides full-service contract metal fabrication for a variety of customers, including OEM parts, sub-assemblies, and finished products. Capabilities include CNC laser and plasma cutting, punching, forming, stamping, fabrication, integrated mechanical and electrical assembly, and full-service finishing.

CUSTOM EQUIPMENT GK specializes in custom manufactured heavy equipment. Just a few of the unique products we've built for customers include mining conveyors, locomotives, rail cars, coil tippers, low-profile conveyors, trail-building machines, and many more!

How can we help?

It is difficult to adjust to the ever changing needs of modern farming – from changing weather patterns, to rising fertilizer and fuel costs. There are many challenges to farm productivity and profitability. We help farmers rebuild and protect the life in their soils to yield a healthy and productive farm for today and future generations by increasing crop yield and nutrient availability!

Why Earthfort?

Since 2004, we have worked with farmers to rebuild & protect the life in their soils to yield a healthy and productive farm for today and future generations.

Soil Fortify® aims to replenish humic acid & organic matter content, while feeding your underground livestock through complex carbohydrates and amino acids. Fish protein hydrolysate is an added Nitrogen bonus!

We Make Products Locally in the Willamette Valley to help your soil, and sell it internationally!

Soil Science Education – Report Reviews, In Person Workshops, Virtual Soil Education Courses.

Soil Life Testing Laboratory – We use direct methods to measure the biology.

Where do I start?

Start a product trial with Soil Fortify. You'll be surprised at how little it takes to make a huge difference! You are just steps away from improving your soil life. Visit us at earthfort.com. Reach out to us today, and together we can bring your soils to life!

Hazelnut Equipment

503-873-9872

WurdingerManufacturing.com

Wurdinger Manufacturing provides exceptional hazelnut harvesting equipment designed specifically for Willamette Valley hazelnut orchards and over the years has furnished machinery and equipment to nurseries in many parts of the country. Wurdinger offers steadfast quality, innovative designs and excellent customer service.

Hazelnut Harvesting Cart

The Wurdinger Manufacturing Hazelnut Cart is specially designed to be used with the Decloet Hazelnut harvester, but can also be used with any standard harvester.

- **Rear discharge** - convenient
- **Removable lid** - cart can be used with any standard Hazelnut harvester
- **Inset hydraulic auger motors** - for unobstructed turning
- **Simple hydraulic design** - lends itself well to a standard open center or closed center system
- **Extra-wide tires** - helps minimize orchard damage
- **Belted Rod Chain for the final discharge conveyor** - allows fine dust and debris to be removed before it enters your tote; gives trouble free service

Nursery Equipment Specialists

We manufacture many products for the nursery industry, including:

- Conveyors
- Cultivators
- Dinger 25 Express
- Hand Carts
- Hoppers
- Mixing Systems
- Mobile Flat Filler
- Orchard Groomer
- Potting machines
- Rack Transporter
- Specialty Products
- Tote Dumper

Albany, OR

PBM SUPPLY & MANUFACTURING, INC.

Celebrating over 50 years in business, PBM Supply & MFG., Inc. has a rich history of building specialized spraying equipment for agricultural, pest control, turf, forestry, and ground maintenance customers all along the west coast. PBM started as a forestry supply company and quickly began building herbicide spot sprayers to outfit the new ATVs that were becoming popular with the local farmers in the area. The spot sprayers grew into orchard boom sprayers, and orchard boom sprayers into field boom sprayers and before they knew it, PBM had a full line of sprayers, trailers and injection pumps that met the needs of the local markets.

PBM's sprayers are available in many different styles, from small pull-behind trailer sprayers for ATV's up to 500 gallon 3-point sprayers for tractors, and even standalone self-propelled sprayers with fully enclosed cabs. PBM prides themselves on being able to offer a spray system for many of the crops grown in the pacific northwest including hazelnuts, blueberries, grass seed, grapes, hops, and everything in between. The level of quality, service, and support that PBM strives to provide is apparent in their workmanship, they use only high-quality, name brand components, thick wall steel tubing, and easily serviceable designs that allow for quick adjustments and easy repairs in the field. Stop by PBM's booth #224 in the Santiam building at this year's Willamette Ag Expo to see if they have a piece of equipment for you.
